## EXPERIENCE

### Associate Software Engineer

#### Galaxy Weblinks

May 2022 – Ongoing Indore, India

- Developed GraphQL APIs using Graphene-Django and Postgresql for Prixview project. And taking full ownership of this project from Backend and worked on various modules like Horse, Riders, Owners and Result Profile.
- Developed RestAPIs using Python Flask, serverless AWS Lambda and MongoDB for Pilgrims Project which serves online streaming of video and Audio files according to language filter and priority order.
- Developed Airstarion project from scratch by using Django Rest Framework (DRF) that gives service for online streaming of audio and video files.

### Software Engineer

#### Anand Rathi Wealth Management

Sept 2021 – April 2022 Mumbai, India

- Developed Digital Wealth Management project from scratch by implementing REST APIs using Python Flask and migrate legacy monolithic system to a serverless AWS Lambda, AWS RDS and use AWS API Gateway to serve requests. Implement Redis-backend caching to decrease data access latency. While implementing design architecture in development. I worked on various modules of projects like portfolio management on the basis of strategy individual, model portfolio, scheme details having s3 pre-signed URL, and wealth strategy alteration on 7params. We use AWS Event-Bridge for audit purposes of the client app. Cognito for the login process, S3 for storing pdf, SSM parameter for storing DB creds. Use Vcs as Bitbucket, Jira confluence for reporting documenting things and Openapi for API documentation.

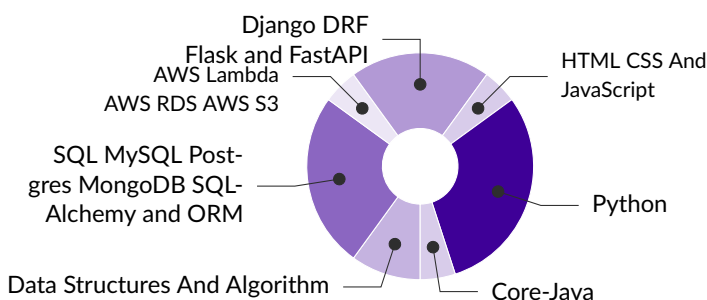

### Backend Developer

#### Anand Rathi Wealth Management

March 2021 – sept 2021 Mumbai, India

- Developed RESTAPIs using Python Flask and migrate legacy monolithic system to a serverless AWS Lambda, AWS RDS and use AWS API Gateway to serve requests. Implement Redis-backend caching for our RESTAPIs to decrease data access latency.

## SKILLS

## OBJECTIVE

*"To work with the best of my abilities and skills in order to benefit my organization to be better others in this competitive Time an influential position in the organization."*

## PROJECTS

### Saharsa Public School

This is fully responsive school website that show all details of the school and their services. This project is completely made on (HTML,CSS and JavaScript) Github link :- <https://github.com/wickywinner/sps> Website link :- <https://saharsapublicschool.com/>

### Hacker Rank Automation

This is Automation Project created by using JavaScript and the puppeteer module. In this project browser automatically login with users credentials and select one question by filtering some tags and then write code solution and then submit it. GitHub link :- <https://github.com/wickywinner/WEB-DEV/tree/wicky/lec27/HRAutomation>

### Portfolio

Creating my own portfolio website using Django, HTML,CSS, JavaScript, Postgres and Fontawesome.

## LANGUAGES

English

Hindi

## EDUCATION

B.Tech In Electronics And Communication Engineering

Haldia Institute Of Technology

Aug 2017 – June 2021

Higher Secondary

S. D. M Inter College Bishanpur

April 2014 – April 2016
